

1st Workshop on local adaptation promotion "How to promote adaptation action in region?"

Mitsubishi Building, 2-5-2 Marunouchi, Chiyoda-ku, Tokyo, 5 December 2018

**Local and regional adaptation measures in the context of
national and international ambitions: the case of Rotterdam**

Dr. Kim van Nieuwaal – Climate Adaptation Services

**Climate
Adaptation
Services**

Ministry of Infrastructure
and Water Management

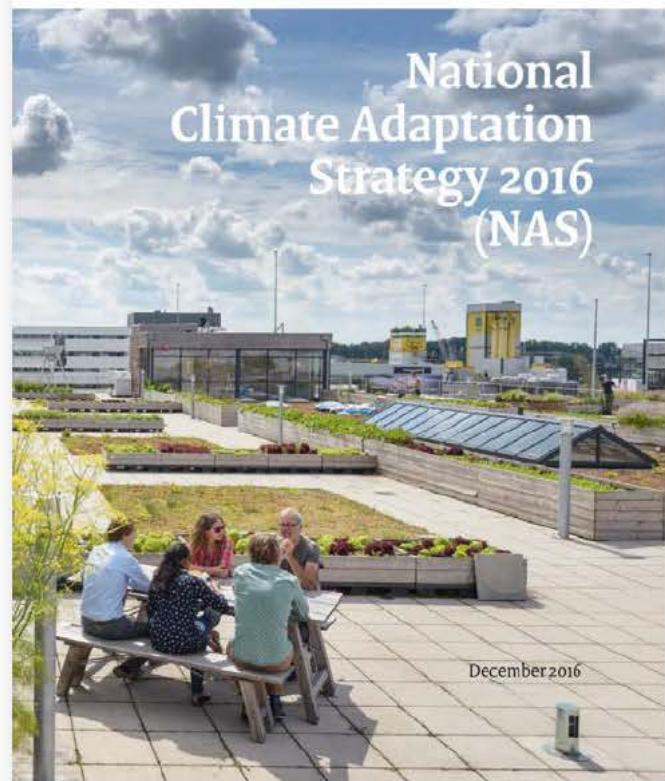

National policy: National Climate Adaptation Strategy

Four climate trends and their impact on nine sectors

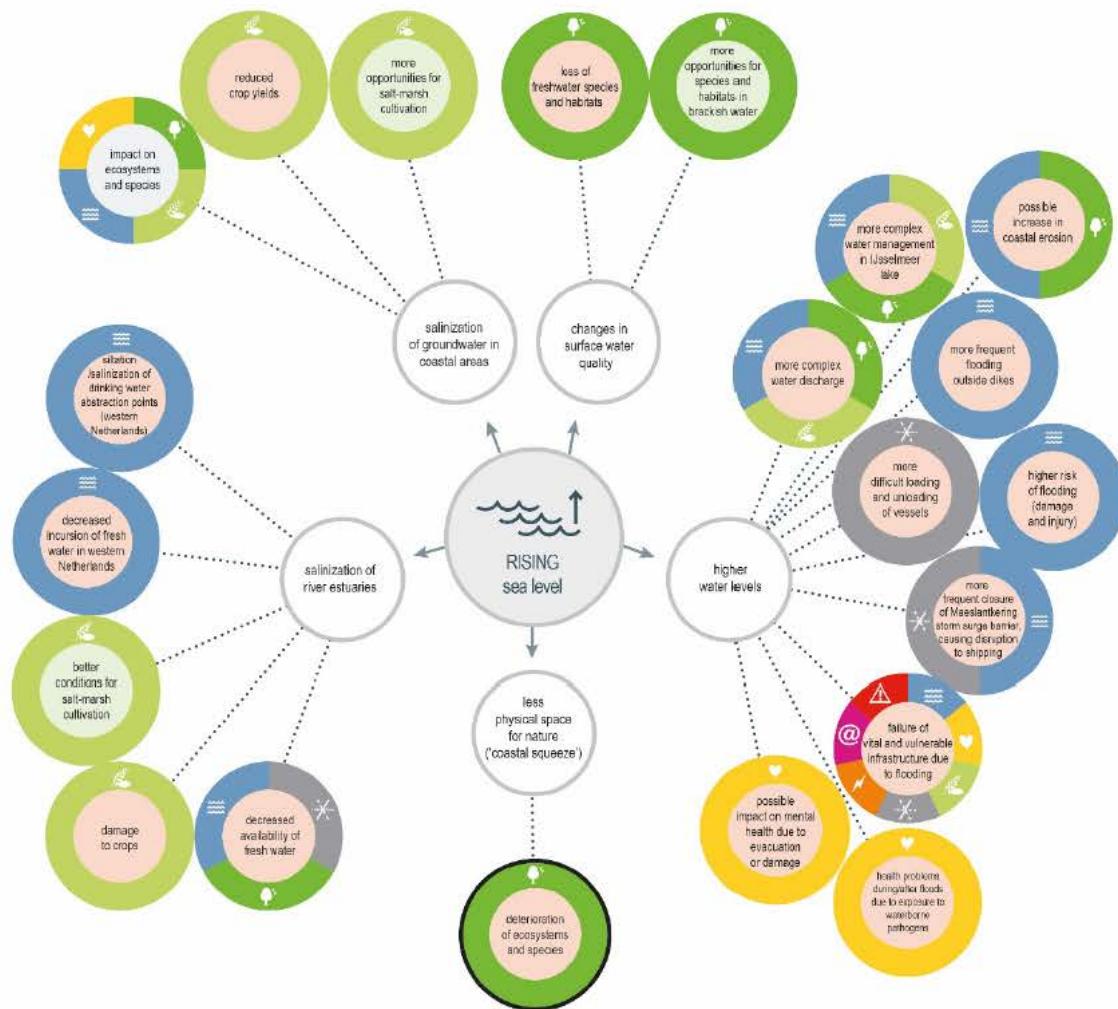

C2

Adapting with ambition

NAS NL: effects of sea level rise

National Climate AdaptationStrategy (NAS)
Climate trends, climate impacts
and consequences for sectors

Climate trend

Climate impact

Implications for sectors

Sectors

- Water and spatial management
- Nature
- Agriculture, horticulture and fisheries
- Health
- Recreation and tourism
- Infrastructure (air, road, rail, water)
- Energy
- IT and telecommunications
- Safety and security

Impact

- Medium to marked effect: this decade
- Marked effect: this century

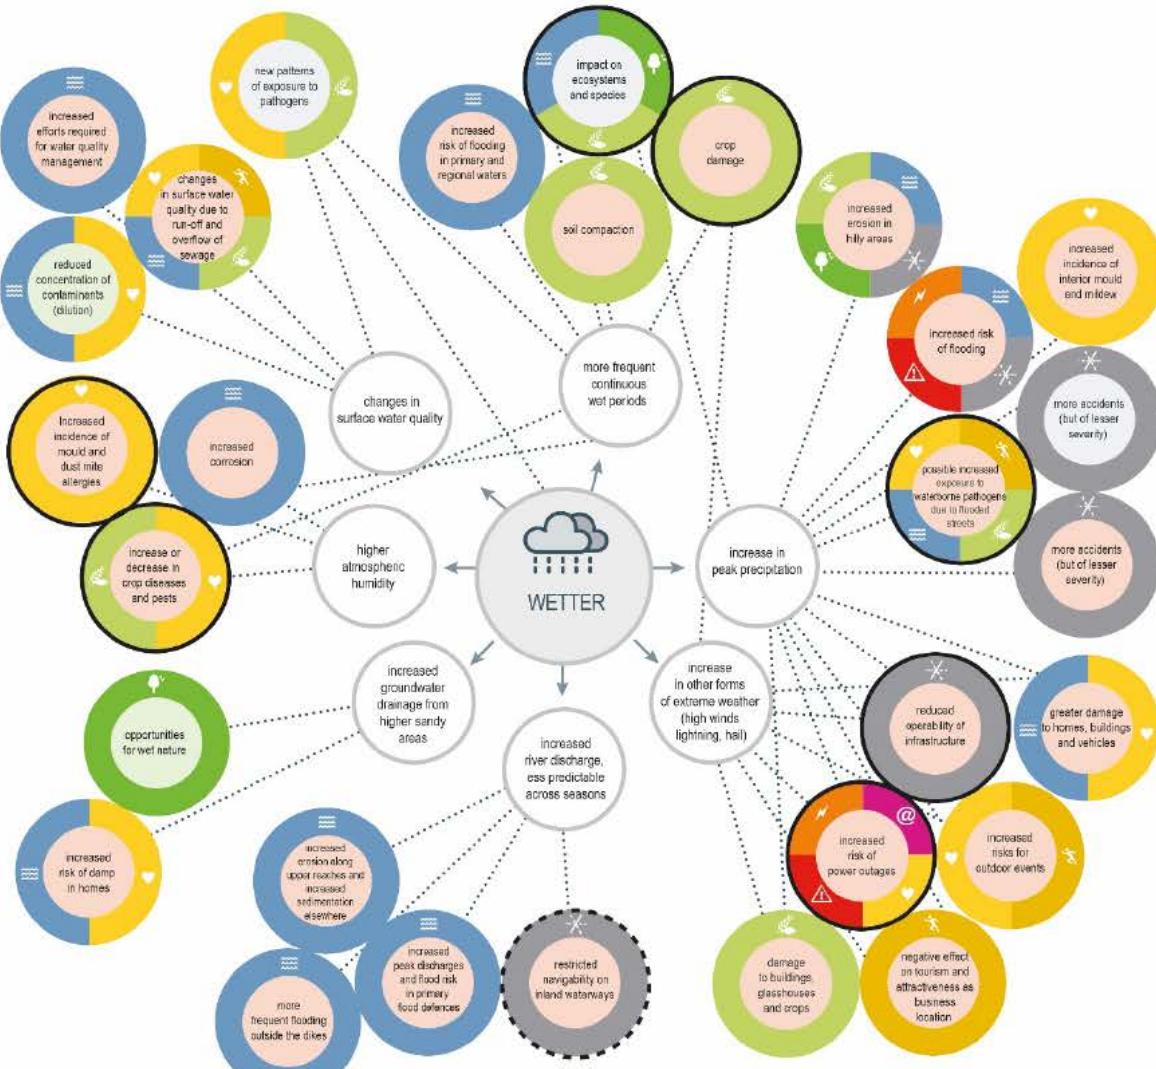

Nature of effect

- Effect is an opportunity
- Effect is a threat
- Unclear whether effect is an opportunity or a threat

- source: •PBL, Aanpassen met behulp klimaatverandering klimaatverandering ('Adapting to climate change'), 2013
•PBL, Aanpassen aan klimaatverandering klimaatverandering ('Adapting to climate change'), 2015
•NAS workshop sessions, 7 June, 1 September and 12 October 2016

One Aim:

- Keeping NL a good, safe and attractive place to live and work for present and future generations (→ 2100, long term perspective)

Two Goals:

- Safe, now and in the future (2050-2100)
- Fresh water supply guaranteed, also in dry periods

Three Basic values:

- Solidarity, Flexibility and Sustainability

Not in answer to a disaster, but in advance, to be prepared or avoid it

The Rotterdam Experience

The Process

Water = Urban Quality...

Rotterdam climate change adaptation strategy

Holistic, multi-level and multi-stakeholder strategy

Robust and resilient

Sewerage + watersquare

Protection and moving in tune

Dikes + adaptive building en design

Delta works, small scale projects

Storm surge barriers + 'Remove tile, plant greening'

Technology and nature

Pumping + green banks

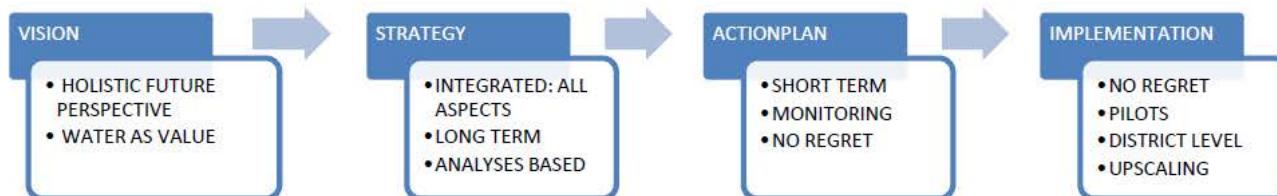

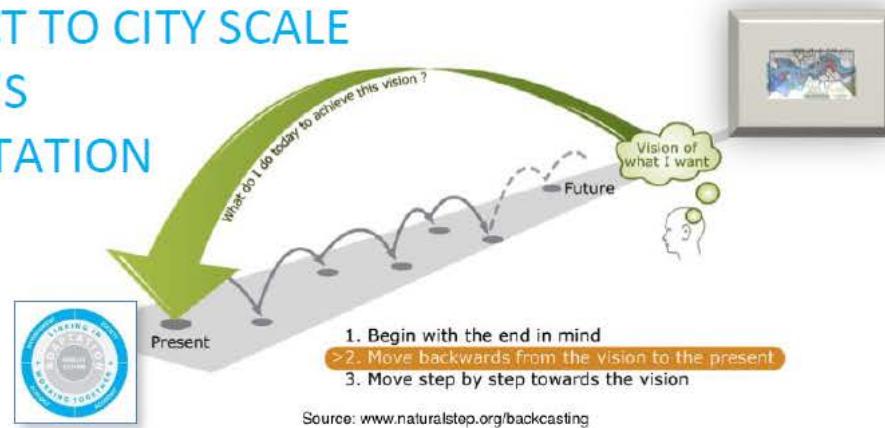

Timeline Rotterdam's transition process towards a resilient delta city

Water -----
+ Spatial Planning -----
+ Climate Change -----
+ Resilience (wide spectrum) -----

Rotterdam Approach (10 principles)

1. TRANSFORM CHALLENGE'S INTO OPPORTUNITIES
2. ADD VALUE: CREATE A BETTER CITY (HOLISTIC)
3. USING WATER AS A DESIGNING PRINCIPLE
4. INVEST IN MULTI BENEFIT SOLUTIONS
5. LONG TERM VISION WITH SHARED OWNERSHIP
6. SHORT TERM ACTION PLAN
7. LEARNING BY DOING: START NO REGRET MEASURES
8. UPSCALE FROM OBJECT TO DISTRICT TO CITY SCALE
9. EMBED CLIMATE RESILIENCE IN 4 P'S
10. CREATE AN ECOSYSTEM OF ADAPTATION

Implementation

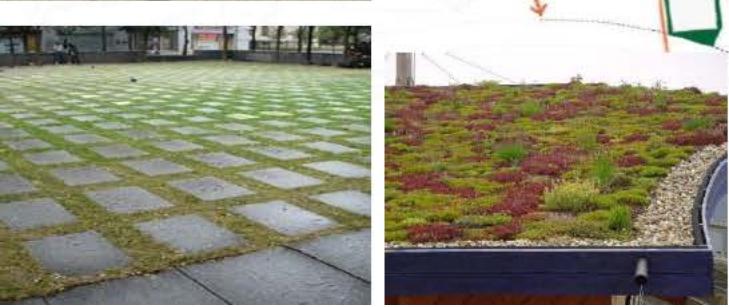

Green Roofs Program: community involvement

ZOHO: First Climate Proof District

Building a green framework and programmatic clusters for and with the neighbourhood

Rotterdam climate change adaptation strategy

Perspective for the climate resilient delta city

Illustrative reproduction of the possibilities for climate adaptation for different types of city districts

- What **measures** could we apply here?
- Which **stakeholders** are important to play a role?
- What **value** is added by those measures?
- Which stakeholders **profit**?

100 RESILIENT CITIES

ROTTERDAM.
MAKE IT
HAPPEN.

RESILIENT
ROTTERDAM

OUR RESILIENCE GOALS.

1. Rotterdam: A balanced society

2. World port city built on clean and reliable energy

3. Rotterdam Cyber Port City

4. Climate resilient Rotterdam to the next level

5. Infrastructure ready for the 21st century

6. Rotterdam Networkcity – truly our city

7. Anchoring resilience in the city

RESILIENCE GOALS.

GOAL 4:

CLIMATE ADAPTIVE ROTTERDAM TO A NEW LEVEL

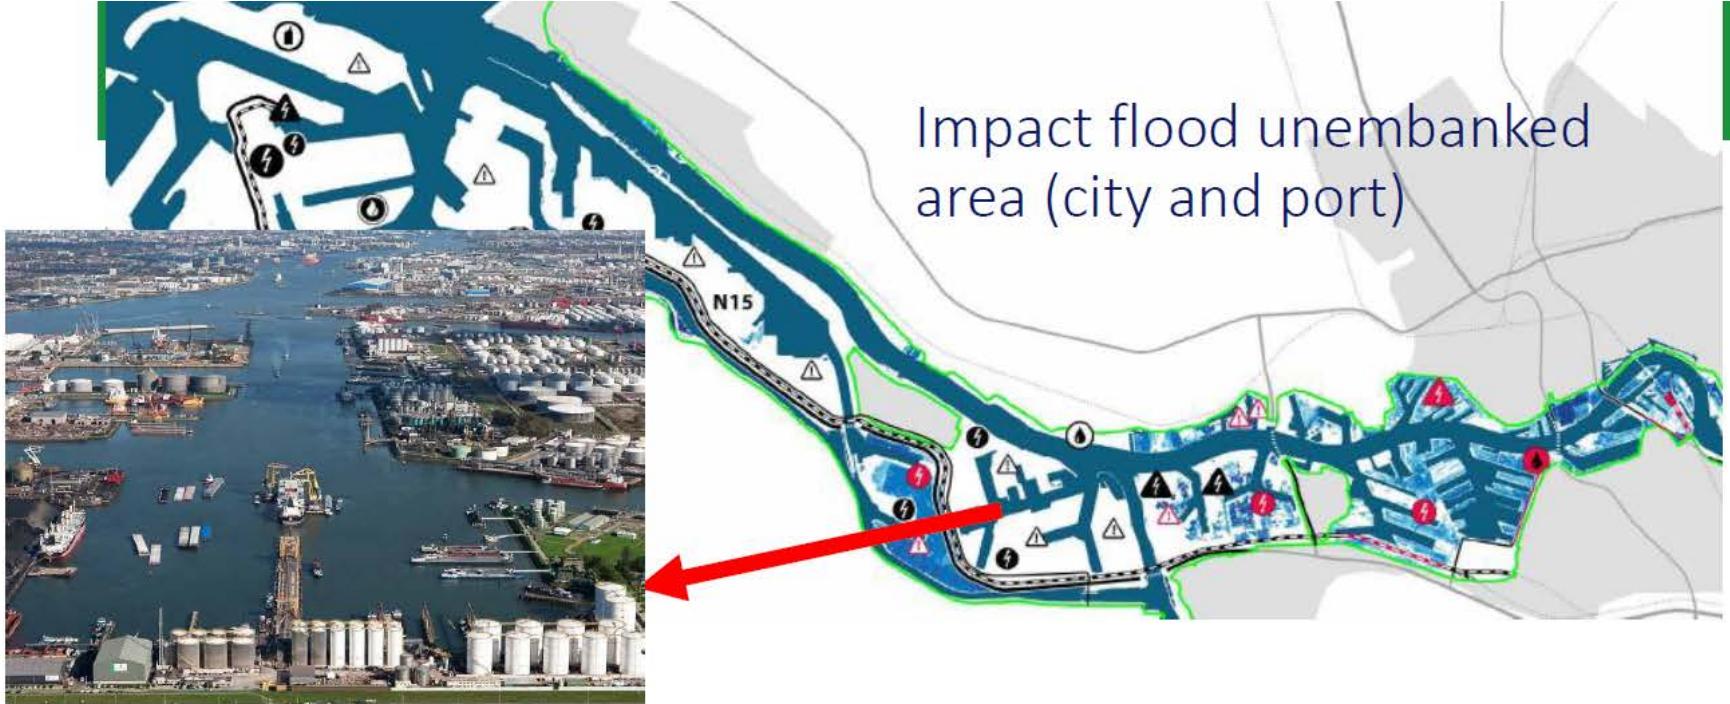

**“Climate proof plus cyber
proof critical infrastructure”**

**“Large scale implementation
of small scale solutions
together with citizens”**

**“Next level of integrated
approach”**

**1.000.000 M² SUSTAINABLE
ROOF LANDSCAPE IN
ROTTERDAM CITY CENTRE**

Impact flood unembanked area (city and port)

- Flood probability (1:4.000)

vs

External safety regulation (1:100.000)

Questions addressed via public/private joint fact finding:

- vulnerability of chemical plants?
- acceptable risk level?

Return period	Direct losses (in billions Euro)	Indirect losses (in billions Euro)	Total losses (in billions Euro)	Time to recover (99% of initial production)
1/10	0.22	0.13	0.35	18 days
1/100	0.44	0.29	0.73	78 days
1/1,000	0.76	0.61	1.37	173 days
1/2,000	0.92	0.83	1.76	255 days
1/4,000	1.10	1.14	2.23	351 days
1/10,000	1.88	2.51	4.39	647 days

EAD (million Euro/year)	36.1	23.4	59.5

Estimated flood damage is very high due to chain effects
