German Environment Agency
Competence Center Climate Impacts and Adaptation

Science-policy-practice interaction: KlimAdapt User-Provider Network on climate adaptation services

NETWORK ORGANISATION

- 50 members from national, regional and local authorities,
 business associations, NGOs, companies from different sectors
- Meetings: 2-3 times/year. Since 05/2018

NETWORK TASKS

- Identify gaps between provided & needed adaptation services
- Further develop user-oriented climate adaptation services
- Support the further development of the KLiVO Portal
- Discuss and increase the usage of adaptation services

RECENT TOPICS OF NETWORK MEETINGS

- Preventing urban heatstress how can municipalities deal with prospective heatwaves?
- User engagement by adaptation services
- Communication, networking, consulting by adaptation services

Source: UBA

Expectation from platform to science: Quality assurance for services on the KLiVO Portal

Mandatory criteria	Facultative criteria	Classification criteria
- Clear reference to climate	- Tailored to user needs	- Phase within adaptation
change	- User-friendly	policy cycle
- Applicable to Germany or	- User involvement in the	- Field of action
German regions	development of the service	- Climate impact
- Up-to-date and regularly	- Clarity	- Region
updated	- Feedback	- Target group
- Scientific basis	- Practical experience with	- Type of climate service
- Free-of-charge/open access	the service	- Federal level or federal state
- Cooperation with or funding	- Best-practice examples	level
from public entities (for	included	- Climate variable
non-governmental		
organisations)

organisations)		

Challenges for climate services to fulfill the science-policy-practice interaction:

- From information to applicable service
- Continuous exchange with users: pre-, during, post-development of service
- Monitor, evaluate, update climate services regularly

Upcoming publication: Hoffmann, Rupp, Sander (2020): What do users expect from climate adaptation services? Developing an information platform based on user surveys. In: Handbook for Climate Services. Springer
