## The Dutch climate adaption platform on the science-policy interface

## Kim van Nieuwaal

**3rd International Climate Change Adaptation Platform Meeting** 

Tsukuba, Japan – Nove, ber 28, 2019

Climate Adaptation Services

The Knowledge Portal is the pre-eminent source of information for everyone engaged in climate adaptation. It features practical information, useful tools, inspiring examples, and the latest news. Together, we will climate-proof the Netherlands.

#### Setting to work as

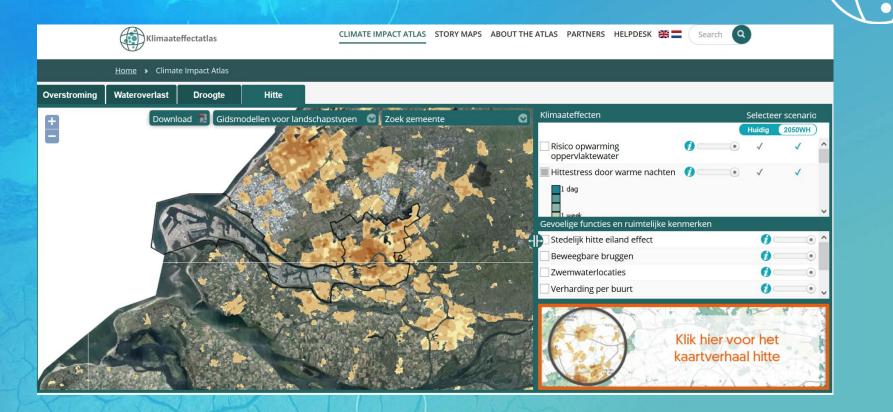

# The Dutch platform

→ Professional

→ Administrator

→ Teachers and students

### **Climate Impact Atlas**

## Current topics managing the Dutch portal

- 1. <u>Knowledge and information related to developing and</u> <u>operating national climate change adaptation information platforms</u>
  - Topic: to what extent is interactivity e.g. forum desired?
  - Topic: to what extent should the general public be addressed?
  - Topic: what can visuals add?
  - Topic: how to manage the growing content?
- 2. <u>Sharing recent activities in supporting local government and other</u> <u>stakeholders working on climate change adaptation</u>
  - Topic: how to arrange the 'platform of platforms' constellation?

3. Science-policy-practice interaction. Expectation from platform to science

Issue: how can the platform contribute to monitoring and evaluation?

## A platform of platforms?

#### National platform

**Provincial platform** 

Het Kennisportaal is dé informatiebron voor iedereen die werkt aan klimaatadaptatie. Je vindt hier praktische informatie, handige hulpmiddelen, inspirerende voorbeelden en de laatste nieuwtjes. Samen maken we Nederland klimaatbestendig.

#### **Provincial platform**

## A platform of platforms?

### National platform

**But also National** Adaptation Strategy

#### **Provincial platform**

and the second

and the second

### **Provincial platform**

Wat kunt u zelf doen

PROVINCIE IL UTRECHT

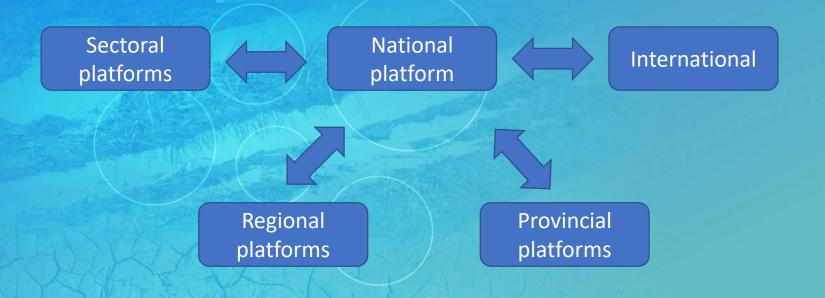

Provincie Noord-Brahant

#### Naar een klimaatbestendiger **Noord-Brabant**

Samen bereiden we onze provincie zo goed mogelijk voor op zwaardere regenbuien, langdurig hogere temperaturen en droge perioden en een stijgende zeespiegel
